Commitment to achieving Net Zero

Cloudera is committed to achieving Net Zero emissions by 2040.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Emissions reduction targets

In order to continue our progress to achieving Net Zero, Cloudera has partnered with Watershed to comprehensively measure our carbon footprint.

Our measurement process uses an operational boundary approach in accordance with the Greenhouse Gas Protocol on corporate accounting & reporting, and includes a comprehensive Scope 1, Scope 2, and Scope 3 evaluation using both primary activity data as well as spend based emission factors.

We project that carbon emissions will decrease by 26% over the next five years.
